### **BEST PRACTICE – ILMS SOFTWARE**

Chebrolu Hanumaiah Institute of Pharmaceutical Sciences with an objective to assess and monitor student progress along with the academic track has adopted a new Learning Management System (LMS) from this academic year. The LMS software namely “VMEDU LIFE” was purchased from a cloud technology based software company VMEDU LIFE Software Pvt. Ltd. This software can also be accessed through mobile phones using the app “VMEDU LIFE” on both android and ios versions. This platform majorly focuses on three parameters namely outcome based education (OBE), teaching and learning process and enterprise resource planning (ERP).

The outcome based education covers course outcomes (COs) and programme outcomes (POs) of the institution along with academic planning, results analysis, online exam conduction, assignments, and online feedback systems. The COs and POs of all the courses were incorporated in the outcome section which will be correlated by the staff during academic planning. The staff enters academic planning details which cover the topics and the sessions handled by them. In the results analysis section, the staff maintains the records of scores obtained by the student in internal examinations, day-to-day assessments, and comprehensive viva voice. This enables the staff, mentor and principal, to assess the overall academic progress of the student.

The teaching and learning process section details the student data, events organized by the institution, notice board, mentoring, training and placement, online grievances, staff profiles and various committees. The basic student details were incorporated and separate login id and passwords were provided to the students for their easy access. All college events were posted in the event section for student attention. The staff can update their academic profile details such as conferences/seminars/workshops attended, publications, and other academic achievements using my profile tab. The leadership board will keep a track staff promptness in updating the details.

The enterprise resource planning (ERP) section includes library management system, staff leaves management, inventory, student fee particulars, student admission details, issue of certificates, and salary details of the faculty. The managerial staff will enter the student admission details, fee and staff salary. The staff can avail leaves through this portal. Students can also apply for transfer, study, and conduct certificates in online mode. The salary slip of the staff can also generated by using this software.

This software enables the students to regularly follow their attendance, internal examination scores, day to day assessment and comprehensive viva-voice scores. The staff maintains their academic profiles and progress through this software. Apart from this, they also incorporate the students’ attendance and their academic progress in the software. The administrative staff can also monitor the salary details of the staff and student enrolment using this LMS. The Principal and management can access all the details of the students and staff at any point of time with this software.

Academic Planning

Course Management

Create different courses and assign it to the respective instructors. You may create both theoretical and practical courses along with electives. Easily assign the elective subject to selected learners. In case of shared courses, assign multiple instructors to one course.

Syllabus Management

Easily maintain the syllabus for the courses along with the subtopics. Divide them as per the teaching hours. Link with course outcomes and unit outcomes. Once the syllabus added, it will automatically generate the session plan based on hours given to each topic.

Session Management

Generate weekly, monthly session plan within a few clicks. Set rules for effective implementation. Manage requests from instructors for session updates. Transfer session on the fly. Confirm session and conduct classes online. Generate multiple reports as per your need.

Importance of digital academic planning

**Online Academic Planning** contains information regarding proposed plan, completion details, gap analysis, teaching aids/methodologies linked with students' attendance of sessions. It will be stored in online mode for minimum five years of duration. It will help you to get previous minimum five years of data in one report. As per our experience of digital planning since the last five years, it has been proved beneficial for those institutes using this facility on regular basis. Now they have all previous year's data available within clicks in ready to print format. If you are publishing your subject planning at start of academic year, then students can easily access the planning and plan their study accordingly. It is beneficial especially for those students who are preparing for competitive examinations to plan the study in advance.

How it works?

Once any institute opts for vmedulife platform implementation, they may start their academic activities by adding the courses and assigning them to the concerned instructor. Once the course will be assigned to any
